## DETAILED ACTION

### *Election/Restriction*

1. Claims 2-10 and 12-19 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No.6 and 8.

In addition, Newly added claim 21 is also withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to an invention not readable on applicant elected species. Claim 21 recited the subject matter of a Cu layer surrounded fully by a Ti layer and also covered at least partially by a titanium oxide layer, which is readable on the species 2 of Fig. 2 in view of Fig. 1, but it not readable on the elected species of Fig.3 in view of Figs. 1 and 7A-8C.

Accordingly claims 1-21 are pending in this application; and claims 1, 11 and 20 are active in this Office action.

### *Drawings*

2. The proposed drawing correction and/or the proposed substitute sheets of drawings, filed on 8/26/02 have been approved. A proper drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The correction to the drawings will not be held in abeyance.

### ***Claim Objections***

3. Claim 1, 11 and 20 are objected to because of the following informalities and/or defects:

In claim 1, lines 1 and 2, the term of "surrounded" should read as --coated-- or --covered--, as the word of "surround" may mean to extend on all sides of simultaneously or to encircle.

In claims 1 and 11, the term of "wiring" should read as --wire--.

Appropriate correction is required.

### ***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 11 and 20, as being best understood in view of the above claim objections, are rejected under 35 U.S.C. 103(a) as being unpatentable over Shinichi (JP 3-152807, 06/91; of record) in view of Masaki (JP 10-153788, 06/98; of record).

Shinichi discloses a TFT substrate (Figs. 1-4; also see the English Abstract), comprising a wire formed of a layer comprising Cu (12b) coated with a Ti layer (102a) along the bottom side.

Shinichi does not expressly disclose that the wire can also be covered by a titanium oxide layer along at least three sides. However, one of ordinary skill in the art

Art Unit: 2811

would readily recognize that a titanium oxide layer can be used to covered a wire comprising Cu for improving the wire's corrosion resistance, as evidenced in Masaki. Masaki teaches to form a wire comprising Cu coated with a metal oxide layer, wherein the metal oxide can be titanium oxide (see the last sentence in its DERWENT BASIC-ABSTRACT).

Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to make the TFT device of Shinichi with the Cu-comprised wire being further covered with a titanium oxide layer along three or more sides, as taught in Masaki, so that a TFT device with improved corrosion resistance would be achieved.

Regarding claim 20, an LCD device such as the one in Shinichi normally inherently comprises a second substrate opposing the TFT-forming substrate with the liquid crystal layer therebetween.

### ***Conclusion***

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not

Art Unit: 2811

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
